## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments filed 10-27-03 have been fully considered but they are not persuasive in regard to claims 1 and 5 because Yoshimura et al. teaches a negative electrode that comprises a carbon material, graphite and titanium oxide, TiO<sub>2</sub> which is what is being claimed in claims 1 and 5. In addition, this negative electrode is combined with the same positive electrode, LiCoO<sub>2</sub> as the instant invention (on page 6, lines 11-14, LiCoO<sub>2</sub> is taught). The phrase "as a negative active material" and "as an additive" has not been given patentable weight because what one names the material does not change the negative electrode. Yoshimura et al. teaches the same negative electrode materials with the same positive electrode materials.

### ***Claim Rejections - 35 USC § 102***

2. Claims 1 and 5 are rejected under 35 U.S.C. 102(e) as being anticipated by Yoshimura et al. (6,322,930).

Yoshimura et al. teaches a non-aqueous battery including a positive electrode, a negative electrode and a non-aqueous electrolyte. Yoshimura et al. teaches in column 5, lines 15-22, a negative electrode comprising titanium dioxide (TiO<sub>2</sub>), graphite and polytetrafluoroethylene as a binding agent.

***Allowable Subject Matter***

3. Claims 2-4 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
